# REACH Registration

## “Brexit Update”

### **EU Regulation No 1907/2006 & UK Statutory Instrument 2021/904 on the: Registration, Evaluation, Authorisation and Restriction of Chemicals**

This communication is written to update our customers throughout our supply chain with regards to Tata Steel UK and its REACH registration requirements.

As of 1<sup>st</sup> June 2013, Tata Steel had made all registrations considered relevant under EU REACH, covering a number of substances applicable to our business needs and production practices. A further check was completed to confirm that no further registrations were needed before the final deadline of 31<sup>st</sup> May 2018.

Following the end of the Brexit Transition Period on 31<sup>st</sup> December 2020, the REACH registrations relevant to all Tata Steel's UK legal entities were automatically recognised in the new UK REACH regulatory regime. In line with the requirements of UK REACH, Tata Steel will provide all the information required to establish full REACH registrations in the UK to the UK Health & Safety Executive, by the relevant deadlines.

Furthermore, during the Brexit Transition Period Tata Steel engaged intensively with UK and EU-27 based suppliers to ensure the changes to the regulatory regime in the UK would not have any adverse impact on the continuity of supplies critical to the manufacture of Tata Steel's products. In addition, Tata Steel submitted a number of Downstream User Import Notifications (DUINs) by the deadline of 27<sup>th</sup> October 2021.

This is a generic update with regards to registrations and you are encouraged to contact your local market sector or customer technical service contacts for further information if required. Detailed questions can be forwarded internally to the REACH team where needed so that your query can be answered in the most appropriate way.

We will continue to monitor our REACH compliance with regards to substance registration and, if needed will submit further registrations if our current situation changes. We are fully aware of our legal obligations under REACH and have put a series of measures in place to meet these for both our own compliance and our supply chain.

Thank you for your attention in this matter and we look forward to working with you in the future with regards to building our supply chain.
